Muleskinner Engineers See Change During Numerous Iraq Deployments

By Lt. Col. David Lowe

From Right to Left: Capt. Brian Sayer, Staff Sgt. Anthony Goth, Lt. Col. John Akers, Master Sgt. Richard Chapell, Spc. Jeff Meyer

As the Missouri National Guard's 35th Engineer Brigade nears the end of its deployment. Soldiers of multiple tours are reflecting on the changes they've seen during their service.

Almost 60 percent of the brigade's Soldiers are on their second or even third tour. These veteran Soldiers say they have witnessed massive changes.

"I'm excited to see the change that has occurred between my three deployments," said Master Sgt. Richard Chappell, of Syracuse. "There is a tremendous difference between equipment we started with and the equipment

we have now. There are also big changes in Baghdad - during the first deployment it was very trashy. This time, it is much cleaner. They have running water, more electricity and are taking care of themselves more than the last two times."

Chappell, who works for the Missouri Department of Corrections, spent his first two deployments patrolling and conducting route clearance operations. The route clearance mission is designed to locate and destroy roadside bombs, also known as IEDs. Now, he is the noncommissioned officer in charge of Task Force Iron Claw Academy, which is responsible for training the units that conduct route clearance missions throughout Iraq.

Staff Sgt. Anthony Goth, of Harrisonville, spent two previous deployments doing construction and route clearance. Goth said he has seen major improvements in the Iraqi army.

"In an effort to help the Iraqis provide their own security, some Iraqi Army soldiers have graduated from the Task Force Iron Claw Academy and have ridden along on several route clearance missions with our troops," Goth said. "When the Iraqi Army gets the necessary equipment, they will be able to conduct route clearance operations on their own."

Capt. Brian Sayer, a middle school math teacher in Laquey who is on his second tour, is the officer in charge of the academy. The Iraqi soldiers Sayer trains have made him optimistic about the country's future.

"There are some in the Iraqi government and Iraqi Security Forces who truly believe Iraq can be a free, democratic country," Sayer said. "I think the Iraqi security forces are better, although some American soldiers are still skeptical about working with Iraqis."

The brigade's executive officer, Lt. Col. John Akers, a concrete finisher from Troy, has 28 years of military experience. During his first tour from 2004-2005, Akers commanded the Missouri Guard's 1140th Engineer Battalion. Akers said he has not only seen improvements in the security situation, but in the confidence of the civilian population as well.

"There are efforts to clean the streets and there is a much greater Iraqi Army and Iraqi Police presence in the communities," Akers said. "The Iraqi Army is much more of a professional army and I believe they are going to make it. Many businesses are now open and you see a lot of children that are attending school. There are lots of different food products in the markets as well."

Part of the credit for the security improvements goes to the more than 103,000 volunteer local fighters - 31,000 of those in Baghdad alone - who police their own neighborhoods. These volunteers, known as the Sons of Iraq, include former insurgents who have grown disillusioned with sectarian violence.

"The Sons of Iraq are doing a lot of work with coalition forces and it appears to be a very good thing at the current time," said Spec. Jeffery Meyer, of Perryville. "They are turning over the bad guys, and finding IEDs and caches quite frequently."

Meyer, who at home works as an automobile collision technician, serves in the brigade's operations section. This is his third deployment and second to Iraq, where he served previously as a crane operator in a bridging unit.

"My impression during my first tour was lots of dirt, long days and a society that seemed to be uneducated and poor," said Meyer, who served in rural areas during his first tour. "From what I can tell, there are ongoing improvements as far as electricity, running water, and functioning sewers."

The improvements in security have allowed the U.S. military to focus more on restoring public services such as water, electricity and sewage by working with the Iraqi government.

Still, the engineers know there is a lot of work left to be done.

"We continue to fight some of the same issues; mainly the Iraqis' lack of urgency to set their government in place and provide basic services for their people," Akers said.

There still remain some issues needing improvement between American and Iraqi forces.

"We need to continue improving working together as a team with the Iraqi security forces," Chappell said. "American troops need to build their trust in the Iraqi soldiers so together we can defeat the insurgents and al-Qaida."

Overall, this has been a very successful deployment for the brigade.

"The 35th Engineer Brigade has done some great things," Sayer said. "We have a better found and cleared rate for IEDs than anyone thought was possible. We have built everything asked of us and found ways to do it when it was thought impossible."

Part of that success has come from improved equipment that has made their dangerous work safer.

"I've seen changes to the equipment researched and developed for our use in this fight, which has made great improvements over the stuff we had a few years ago," Sayer said. "People need to know their tax dollars buy us the best equipment available and it has saved many, many lives."

Generosity Pays Big Dividends in Iraq

By Capt. Kelly Parker

Iraqi children stand in line to receive school supplies and shoes

faced with the decision to be with us or against us."

With such generous contributions of shoes and school supplies from our friends and families back home, no child went away empty-handed.

"It was very rewarding to see the joy on the innocent faces of the Iraqi children as we handed out school supplies and shoes," commented Lt. Col. David Lowe, Command Judge Advocate of the 35th Engineer Brigade from Dixon, Missouri. "I was honored to extend the good will of the concerned Missourians who donated these items."

The Soldiers of the 35th Engineer Brigade have been heavily involved in many critical construction and route clearance missions throughout Baghdad. These missions are improving the safety and security of Iraq and, along with humanitarian missions, improve America's relationship with the Iraqi people.

As a result of the generosity of many good folks from back home, members of the 35th Engineer Brigade were recently able to provide some humanitarian assistance to local Iraqi children near Coalition Outpost (COP) 342 in Northern Baghdad. Soldiers from the 35th Engineer Brigade distributed to Iraqi children, many items they had received from caring Missouri citizens.

These Soldiers came fully prepared to do their part to assist the Iraqi children of this area. "Humanitarian opportunities like today will help our relationship with these future Iraqi leaders down the road," said Command Sgt. Maj. Chad Lynch, Command Sgt. Maj. of the 769th Engineer Battalion and native of Gonzales, Louisiana. "I believe these children will remember the kindness of Americans later in life.....when they are

Lt. Col. Lowe hands out school supplies to Iraqi children

Lt. Col. Lowe expressed that not only were the children excited about their gifts, their "parents were very grateful" as well. "They showed their appreciation by inviting us into their home for tea and fellowship."

Engineers Complete Partnership By Capt. Jeff Crane

The 35th Engineer Brigade, which is part of the Missouri National Guard, arrived in Baghdad September 2007 and assumed responsibility for providing engineering support throughout the Multi-National Division – Baghdad operational environment. The brigade’s mission was specialized – encompassing route-clearance patrols as well as horizontal and vertical construction.

With assumption of this responsibility, the brigade’s Soldiers began forging a relationship that would blossom into a full partnership with the 6th Iraqi Army Division engineers.

Brig. Gen. Michael Pace, a West Plains, Mo., native, and commander of the 35th Eng. Bde., said he understood the importance of establishing and developing this relationship without delay. “I immediately realized the tremendous benefit, which could be derived by working together and sharing experience and information,” said Pace.

The teamwork was developed and fostered over the course of time which, ultimately, assisted the brigade’s understanding of the 6th IA Div. engineers operational and training capabilities to perform similar types of missions for the Iraqi populace.

The partnership led to collaborative training between both organizations, resulting in both units learning from each other. The units regularly perform joint missions, thus illustrating the desire to work together to protect the Baghdad citizens from threats while building a safe, secure environment for all to live.

Among the many missions the brigade was responsible for included joint route-clearance patrols in which the MND-B Soldiers and ISF hunted, identified and destroyed improvised-explosive devices. The 107th Engineer Battalion, which is part of the Michigan National Guard, was responsible for the route-clearance mission under the 35th Eng. Bde.

“These initial joint route-clearance missions between the 6th IA Div. and (35th Eng. Bde.) were important for giving them the tools and knowledge needed to do the mission. It gave them confidence to be able to do the mission.” said Lt.

Col. Bud Degrote, a Grand Rapids, Mich., native, and commander of the 107th Eng. Bn. “It gave us the confidence they could do the mission – a mission that is welcomed and integral to the future IED fight once they are fully resourced. The 6th IA Div. Soldiers showed great eagerness to learn and showed great pride in doing their mission”.

The 769th Engineer Battalion, from the Louisiana National Guard, worked alongside the 6th IA Div. engineers during joint vertical and horizontal missions, which included concrete work, electrical engineering, surveying and carpentry.

As the 35th Eng. Bde. prepares to depart Baghdad, the relationships fostered between comrades of different nations, united under a common goal, will continue strong.

“I have been an Engineer for 30 years, but the last five years have been the happiest of my life because being an Engineer is now about rebuilding instead of destruction,” said Col. Ahmed, the 6th IA Div. chief engineer. “You will be a part of our history. We appreciate your sacrifice of leaving your families to come here to help us.”

Chief Warrant Officer Four Gary Hanks with 6th Iraqi Army soldier.

Master Sgt. Richard Chappell teaches troop movement to 6th Iraqi Army Soldiers

A Message from Muleskinner 6...

Dear Families and Friends of Soldiers of the 35th Engineer Brigade,

Greetings everyone from Baghdad!! I hope everyone is doing well back home. We are preparing for our Transfer of Authority (TOA) and return home while still supporting the current fight. We have been extremely busy with our mission in addition to welcoming, teaching and sharing the operational workload with the unit replacing us. We call this process the "Right-Seat/Left-Seat Ride."

We are sharing our lessons learned with our replacements as they begin to take over the day-to-day operations. On the day of TOA, we turn the reins of our command over to our replacements and prepare to head out the next day. We are confident that we will leave Theater during the last week of May.

In closing, I want to express to all of you how much I appreciate your Soldiers and the great job they have done during this deployment!! You can be assured they were all very professional in the performance of their duties and truly made a difference here in Iraq. Most importantly, however, I want to thank the spouses and families of our Soldiers. Without your unwavering support, we could not have performed at the level we did. I look forward to seeing all of you when we return home but, for now, I'll just say, "Thank You." You all are true American Patriots!!

Please find below the sequence of events and policy for our return so you know what to expect. The main focus is the initial welcome home, the demobilization process, and the time after leaving Fort Leonard Wood (FLW), our demobilization site.

Here is the PLAN of what will happen but it is always subject to change: There will be the arrival day (**DAY 0**), the demobilization period (**DAY 1-5**), the Home Station period (**DAY 6-8**), and then the Soldier's leave time which will vary from Soldier to Soldier depending on how much leave he or she has earned and used or sold. This also includes those who have administrative leave time (PDMRA) coming to them.

DAY 0

Unit flies to USA – Families should not travel to the arrival airport site as we will not be here very long. Upon our arrival we have to account for all sensitive items such as weapons and baggage. We will then bus the entire company to FLW which is about two hours away.

Arrival at FLW – Depending on the time of day the busses will stop at the barracks so the Soldiers can account and download their gear from the baggage truck. This will be a short time and then we will bus to Nutter Field House where the official Welcome Home ceremony will be conducted and our unit officially welcomed back by the FLW post commander or his representative and the Adjutant General of Missouri or his representative. This ceremony will be fairly short, maybe 20 minutes total. Soldiers will then be released to their families for the remainder of the day (**DAY 0**).

The first formation the next day (**DAY 1**) will be very early around 6:45 a.m. at the armory to start the demobilization (demob) process; the exact time will be announced that evening. This will be the case regardless what day of the week it is; weekday or weekend, or whatever time we arrive at FLW. I recommend Soldiers stay close to FLW on the evening of DAY 0. If by chance we arrive after midnight the first formation time will be moved back to about 1:00 p.m.

DAY 1- 4

Families should avoid their Soldier during the day as the focus is on demobilization. Expect DAY 1 and 2 to run long each day; maybe until 9:00 or 10:00 p.m. each night. The morning will be early as well. At the end of the day the families may see their Soldier on-post or off-post and the Soldier may spend the night with his/her family though lodging will NOT be paid for by the government either on-post or off-post. Lodging is the families' responsibility unless the Soldier stays in the barracks with the unit.

DAY 5

This is the planned last day of demob. Tentatively, we plan to conduct the Freedom Salute ceremony at the Engineer Museum sometime that morning; more on that once we are at FLW.

DAY 6-8

This is the Home Station period which is used for equipment storage and other events at the unit's home station (armory). Since we are already at our home station the unit will PROBABLY be put on PASS for those three days after the DAY 5 Freedom Salute ceremony though that decision will be made during the demob time period.

The official notification of dates and times of our return will be sent by the company commander to Mrs. Cindy Harding the Family Readiness Group Leader (FRG). Any information provided by other sources is not official and is probably not accurate. Families should use your FRG for any questions or concerns and Soldiers will use the chain of command.

Thank you again for your support. I look forward to seeing each of you upon our return in less than two weeks.

MICHAEL B. PACE
Brigadier General, USA
Commanding

A Message from Muleskinner 9...

No Task Too Large – The 35th Engineer Brigade took this motto into the fight and, without question, lived up to its bravado. The successes of the Brigade were seen throughout the city, suburbs, and surrounding rural areas of Baghdad. Achieving that success took monumental effort from every Soldier throughout our deployment.

Teamwork was key to our success during Operation Iraqi Freedom (OIF 07-09). That teamwork was forged by leadership, talent, hard work, and a tenacious desire to prevail. In addition to our Soldiers at Camp Liberty, the team also included our Family Readiness Group, and the many individuals and groups that went above and beyond to support the Soldiers of this Brigade.

We arrived in Baghdad September 1st with the mission of improving the quality of life and safety of the Soldiers of Multi-National Division-Baghdad (MND-B). The 769th Engineer Battalion (construction) and 107th Engineer Battalion (route clearance) were each exceptional in support of that mission. The Brigade was comprised of Soldiers from eight states, each fully committed to proving there truly is...No Task Too Large.

I truly thank everyone involved in this deployment. The families have been tremendous and the Soldiers set the standard expected from the Missouri Army National Guard.

RAY D. HARDING
CSM, USA
Command Sergeant Major

Muleskinners' Final Sapper Call

Muleskinner Awards

Sgt. John Blair receives the Millinery Award certificate for over 1000 Days of active duty service in support of Operation Iraqi Freedom/Operation Enduring Freedom

Master Sgt. Richard Chappell also received the Millinery Award certificate for over 1000 Days of active duty service in support of Operation Iraqi Freedom/Operation Enduring Freedom, but was unable to attend due to mission requirements

Staff Sgt. Anthony Goth receives the Millinery Award certificate for over 1000 Days of active duty service in support of Operation Iraqi Freedom/Operation Enduring Freedom

Spc. Nicholas Zamniak receives an Army Achievement Medal for being selected as the 35th Engineer Brigade Soldier of the Quarter

Spc. Dustin Patrick receives an Army Commendation Medal and a Certificate of Appreciation for being the 35th Engineer Brigade Soldier of the Year

Sgt. 1st Class Bruce Buscher receives the Super Sapper Award for outstanding service as the Personal Security Detail Non-Commissioned Officer in Charge

Maj. David Goodwin receives the Super Sapper Award for exceptional performance in support of the 35th Engineer Brigade mission

Muleskinner Musings

Lt. Col. Bobby Jones takes quality assurance checks to a new...um...low.

"Here...put just one more picture of this big ol' head in The Muleskinner," said Master Sgt. Mary St George as she grabbed Lt. Col. David Lowe around the neck. "Would you like it on a silver platter?"

Maj. Jay Gann poses with his most fearsome bodyguard Staff Sgt. Kevin "The Bruiser" Zimmerman. Maj. Gann was overheard saying, "I never leave home without him!"

Iraq: "The Cradle of Civilization"

By Sgt. Jake Boswell

Iraq was once known as Mesopotamia, which in Greek means "between the rivers." Historians now refer to Mesopotamia as "the cradle of civilization." This land between the Tigris and Euphrates rivers was fertile enough to allow nomadic people to settle into an agrarian society and establish a permanent settlement. Current day Iraq was home to Sumer, the first of these civilizations. Over time the Sumerians lost their power in Mesopotamia and were taken over by other cultures. However, collectively these cultures were responsible for many historical "firsts."

The Mesopotamian cultures were responsible for the first written language (cuneiform); and the first forms of science, mathematics, laws (Hammurabi's Code), and philosophies. These "firsts" created the foundation for all civilizations and their development through the ages.

Soldiers Observe Women's History Month

By Pfc. Samantha Schultz - Multi-National Division Baghdad Public Affairs

Capt. Maureen Wells at the Women's History Day Ceremony

In recognition of the history, accomplishments and contributions of women throughout American society, the 4th Infantry Division, Multi-National Division – Baghdad, sponsored a celebration of Women's History Month at the DeFleury Dining Facility, March 27.

Soldiers serving with the 35th Engineer Brigade, which supports MND-B, hosted the event, which had the theme "Women's Art: Women's Vision" and focused on the great female writers, actresses and other artists, from the birth of our nation through modern times.

Soldiers, both women and men, gathered during their lunch hour to share history, stories, poems and songs made timeless by female Americans. One Soldier shared a poem by Cathay Williams, which tells a tale about an ex-slave woman who went on to fight in the Civil War as a buffalo Soldier.

Another sang popular songs with the 4th Inf. Div. band, including Aretha Franklin's "Respect" while the audience ate lunch.

There was even a trivia game, presented by Lt. Col. Mary Henry, a native of Wilmington, Del., who serves as the deputy officer in charge of the 4th Inf. Div., MND-B reconciliation cell. Henry challenged the audience to answer questions about past and present influential female artists, with the promise of a chocolate prize to the participant with the most correct answers.

In addition to fun and games, the event addressed the sacrifices women have made to secure a brighter future for everyone.

Lt. Col. David Lowe, from Dixon, Mo., shared a brief history of women serving in the U.S. military. From the Civil War in the 1860s to today's Operation Iraqi Freedom, women have been taking an active part in military operations.

"Generations of women have fought in the military services, with each generation changing the roles of women in the service," said Lowe, who serves as the command judge advocate for the 35th Eng. Bde.

According to the Department of Defense's most recent count, there were 201,575 women serving on active duty in various branches of the modern military in 2006.

Of all the women in the service today, there are currently more than 2,500 female Soldiers serving with MND-B in support of Operation Iraqi Freedom, said Command Sgt. Maj. John Gioia, the senior enlisted leader for the 4th Inf. Div. and MND-B.

The female leaders of today's military seem to have come a long way since masquerading as men during the Civil War.

"This month, we honor the extraordinary women of our Nation's past and recognize the countless women who are demonstrating leadership in every aspect of American life," said President George W. Bush in a presidential proclamation signed March 10, declaring the month as Women's History Month.

Whatever a woman chooses to do – whether it's represent her nation, work for a corporation, write a book or simply create a comfortable home for her family – it is the hope of MND-B and the U.S. that women and men will take the month of March to reflect and celebrate the changes womankind has brought to our nation throughout its history.

In Honor of our Fallen Heroes

Sgt. David Eugene Lambert was born in Richlands, Virginia to Howard and Mary Lambert on November 9, 1967. He graduated from Richlands High School in 1985 and went on to attend Southwest Virginia Community College. He was pursuing a degree in Criminal Justice at Bluefield College and was a soldier in the 237th Engineer Company.

David had a passion for sports, especially football. He loved God and his Country. David had no children of his own but raised several foster children. David and his fiancé Heather planned to marry upon his return from Iraq. David served his community for the past 11 years as a corrections officer at Keen Mountain State Penitentiary.

Nov 9, 1967– Oct 25, 2008 Sgt. David Eugene Lambert is survived by his father Howard Lambert, mother Mary Lambert, sister Missy Wheeler and his fiancé Heather Spencer.

Pvt. 1st Class Adam Lee Marion was born on January 19, 1982 in Mount Airy, North Carolina. He earned his high school diploma from Surry Central High in Dobson, North Carolina on June 1, 2000 and enrolled in Surry Community College in Dobson, North Carolina on August 1, 2000 seeking an Associate's Degree in Criminal Justice. Private First Class Marion was a soldier in the 171st Engineer Company.

He was a deeply religious man, frequently attending worship services and Bible studies with his fellow Soldiers. His faith inspired him, and allowed him to inspire his fellow Soldiers during their daily tasks in the Route Clearance mission. Private First Class Marion will always be remembered as a model of selfless service, honor, integrity, and personnel courage. He will be greatly missed.

Pvt. 1st Class Marion is survived by his father Donnie Lee Marion, his mother Pamela Jean Marion, and his older sister Andrin Leigh Marion McCann who reside in Mount Airy, North Carolina.

Jan 19, 1982– Apr 28, 2008

Staff Sgt. Jonathan Michael Forde was born in Fairfax Virginia on January 23, 1981. After attending Gonzaga College High School in Washington, D.C. he then attended James Madison University in 2000 and later Virginia Commonwealth University in 2001. Staff Sergeant Forde was a member of the 237th Engineer Company.

Staff Sgt. Forde is survived by his mother Kathrin Cosby, his step father Taylor Cosby and his girlfriend Brandy Carter.

Jan 23, 1981— Aug 13, 2007

Sgt. Derek Raymond Banks was born in Hampton, Virginia on January 7, 1983. Derek graduated from Bethel High School in 2001, where he was a football star. He loved sports and excelled in basketball and football. Upon graduation, he earned a scholarship to Alabama A&M, and later chose to attend Virginia State University where he met several members of the 237th Engineer Company.

Sgt. Banks is survived by his wife Sheenia, his son Derek Jr. , his mother D. Rene Pearson, his step-father Carl Pearson and his two sisters Britney and Whitney Pearson.

"THE MULESKINNER" is a publication focused on the Soldiers of the 35th Engineer Brigade (a.k.a. Muleskinners) and its engineer mission while deployed to Iraq in Support of Operation Iraqi Freedom. The purpose of this publication is to keep our loved ones and friends at home informed about the Muleskinners in a combat environment. THE MULESKINNER will be produced exclusively by Muleskinner Soldiers to ensure accurate reporting and authentic information.

"THE MULESKINNER" is organized and edited by the Muleskinner's Command Judge Advocate, Lt. Col. David Lowe, and his cohort in crime, fellow Judge Advocate, Capt. Kelly Parker. Paralegal Sgt. Jake Boswell provides technical assistance by overseeing the layout and design. It is our genuine desire to provide timely, insightful, and entertaining information to our readers.

Deployment Countdown

The Muleskinners have completed 97 percent of their deployment. We're anxiously awaiting our return home in less than two weeks!!

A FAREWELL MESSAGE FROM THE MULESKINNER STAFF —

It's been our honor and privilege to provide friends and family a glimpse into the lives of the Muleskinners serving in a combat environment. We have also tried to inject some humor, perhaps unsuccessfully, into each issue. With information and humor as our foundation, we sincerely hope we have brought honor to each of our Soldiers no matter the job they were assigned or the rank upon their chest. We are proud to be associated with each of the Soldiers of the 35th Engineer Brigade...we are proud to forever be MULESKINNERS.

Respectfully,

Lt. Col. David Lowe
Capt. Kelly Parker
Sgt. Jake Boswell
